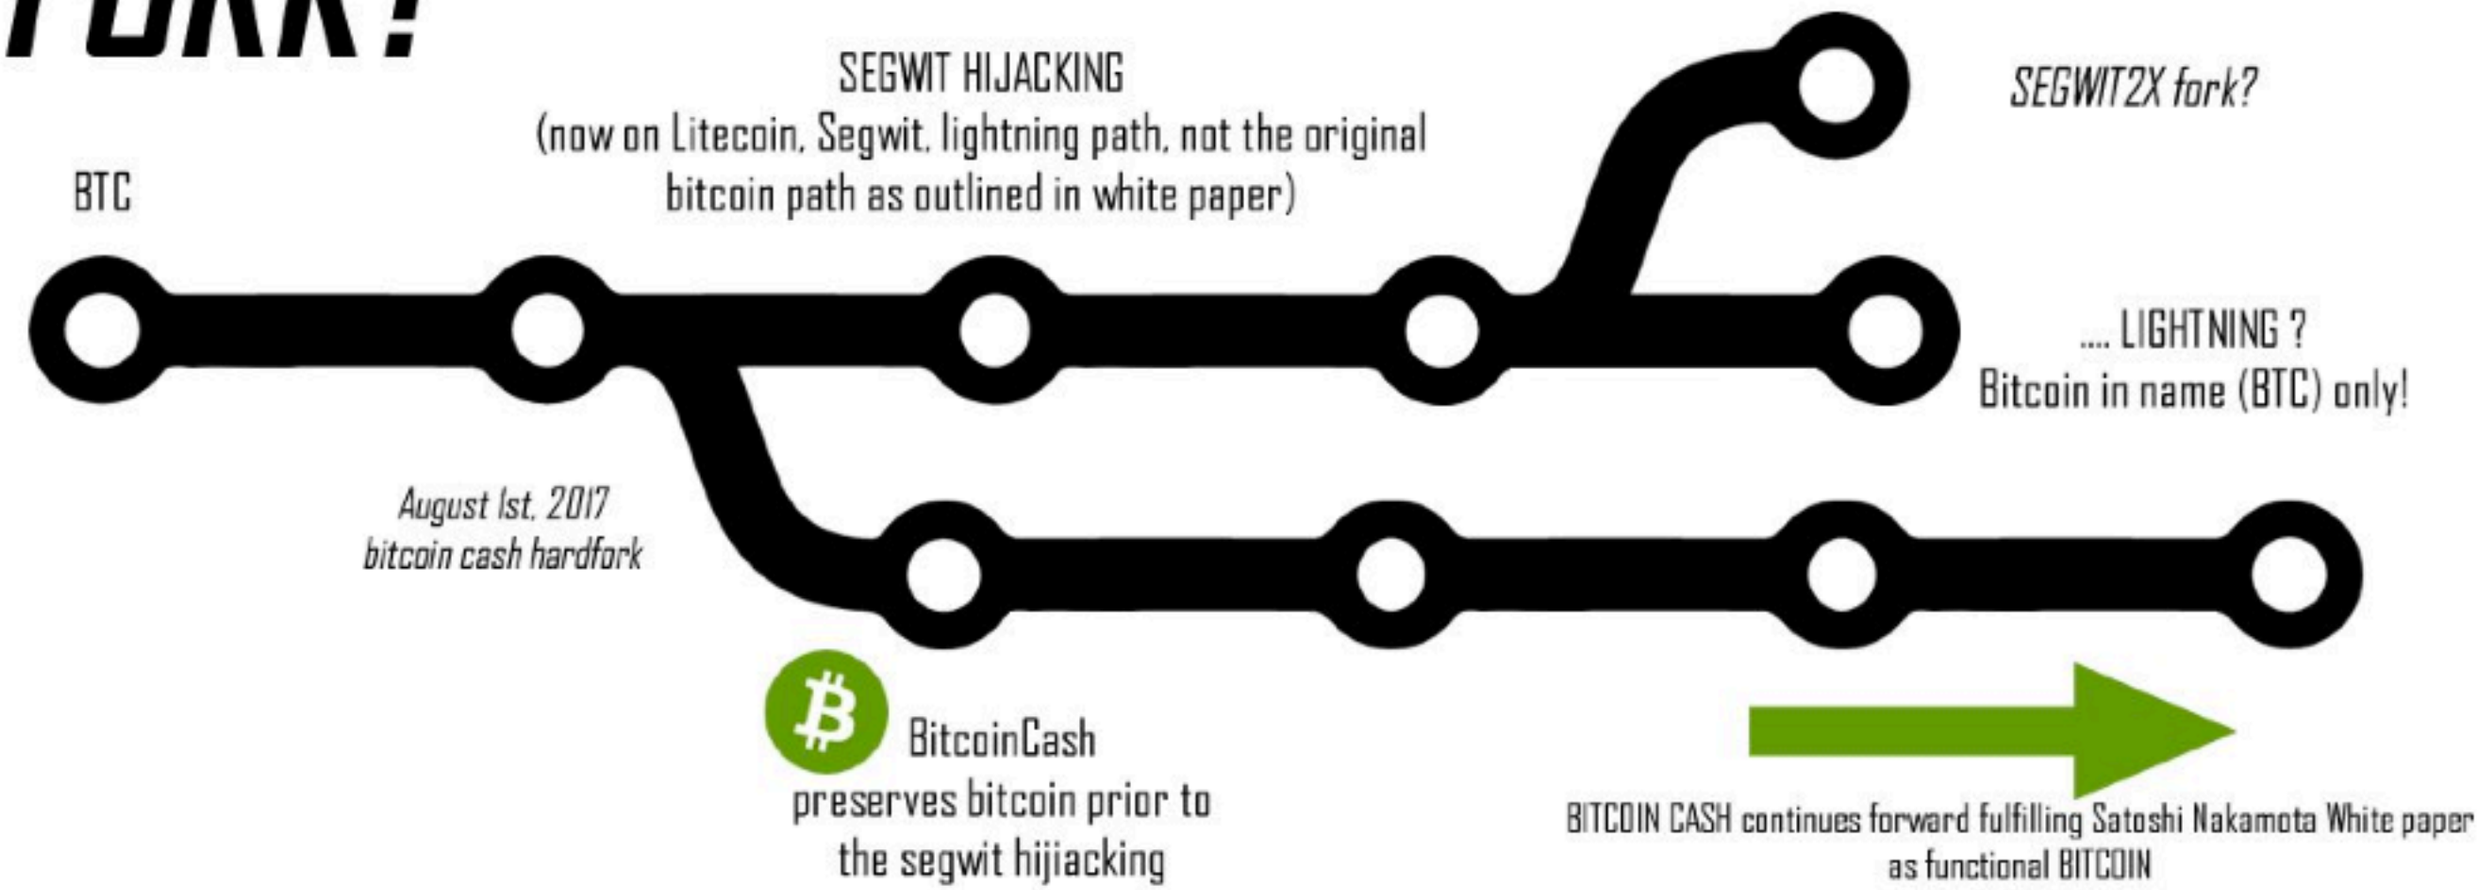
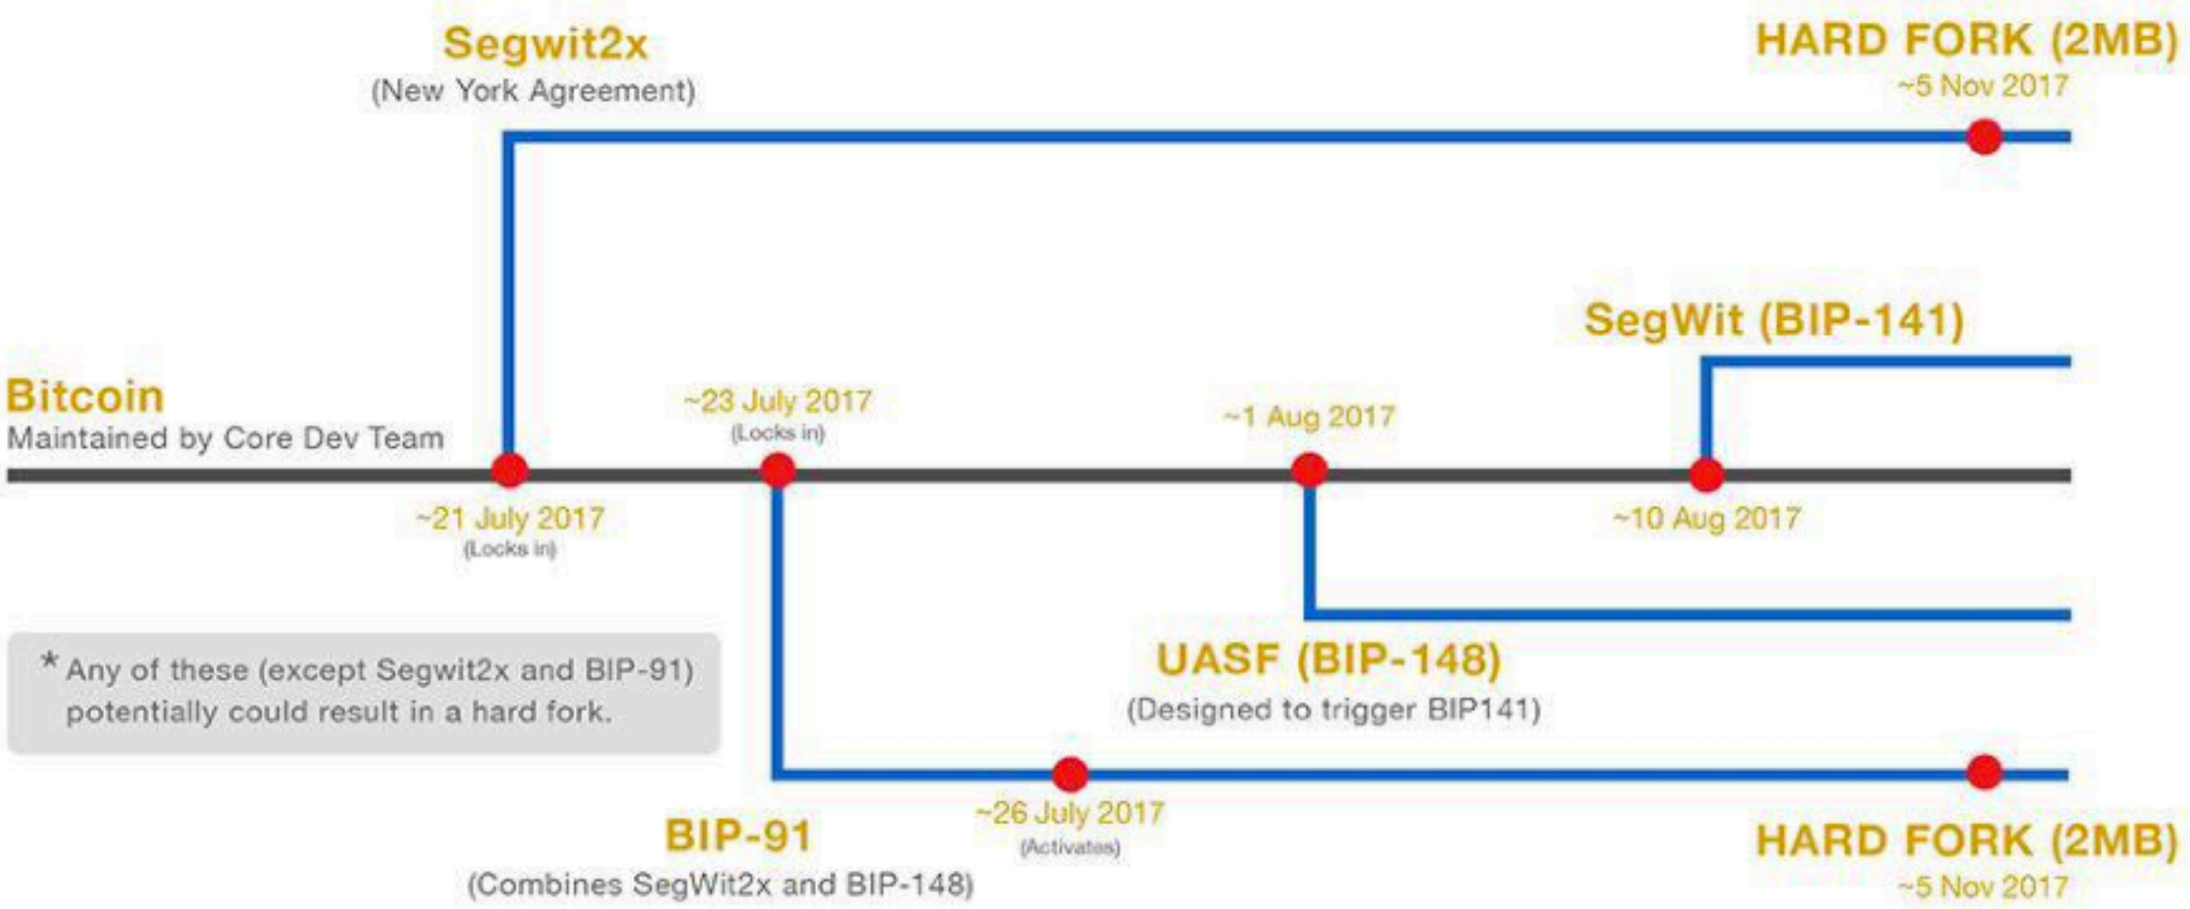
FORK?



SEGWIT HIJACKING
(now on Litecoin, Segwit, lightning path, not the original bitcoin path as outlined in white paper)
BTC
SEGWIT2X fork?
.... LIGHTNING ?
Bitcoin in name (BTC) only!
August 1st, 2017
bitcoin cash hardfork
BitcoinCash
preserves bitcoin prior to the segwit hijiacking
BITCOIN CASH continues forward fulfilling Satoshi Nakamota White paper as functional BITCOIN

KNOW YOUR BITCOIN HARD FORKS!



* Any of these (except Segwit2x and BIP-91) potentially could result in a hard fork.

Segwit2x

Activates Segwit followed by a hard fork to increase the block size to 2MB. Supported by larger mining pools, Coinbase, BitPay, and other DCG companies..

UASF (BIP-148)

User Activated Soft Fork. Specifically designed to activate SegWit (BIP-141).

BIP-91

Combines SegWit2x and BIP-148 to avoid a hard fork.

SegWit (BIP-141)

Original Segregated Witness that was proposed by Peter Wuille, Johnson Lau and Eric Lombrozo. It has wide range of benefits, one of which is the block size increase.
